16. Current Year Prospect

The Group is primarily involved in the trading and services, property development and agriculture businesses. Based on the Group audited financial statements for FYE (“Financial Year Ended”) 31 December 2024, the Group derives all of its revenue from its trading and services business. However, the Group's trading and services business, which is a component of the trading of ICT products industry, has sustained challenging conditions in the recent years, largely attributable to the Coronavirus-19 pandemic, continued uncertainty in the commodity markets, weakening of the Malaysia Ringgit and geo-political tensions.

In order to improve the Group's financial performance moving forward, the Group intends to expand its property development business in order to reduce reliance on its trading and services segment. On 30 May 2023, the Company had obtained shareholders’ approval for the diversification of the Group's existing business to include property development ("Diversification"). The Diversification was undertaken pursuant to a joint venture agreement signed between Compugates Development and Mining Sdn Bhd ("CDMSB”) and Jade Classic Sdn Bhd ("JCSB") on 18 November 2017 for a joint venture development project, where CDMSB and JCSB will act as the developer to undertake the overall development, construction and completion of the JVA Development and CDMSB as the landowner ("JVA Development"). Through the JVA Development, CDMSB will be entitled to a 20.00% share of the GDV, amounting to approximately RM117.00 million.

The JVA Development has commenced Daun Villa phase 1 sales in stages via a soft launch, whereby stage 1 comprises 130 townhouse units and 33 double-storey units, stage 2 comprises of 66 townhouse units and 21 double-storey units and stage 3 comprises 142 townhouse units and 26 double-storey units. The grand opening of the Daun Villa Sales Gallery took place successfully on November 9, 2024, marking an exciting milestone for our development in the vibrant township of Cybersouth. As of today, the entire phase 1 has fully commenced, and all units have been opened for sale due to the positive response. 90% of the units under phase 1 have been booked, of the 418 units over 70% of the S&P has been signed and the balance booked units is pending loan approval or pending signing. As at 18 August 2025, the Group had received payment amounting up to RM 5.96 million from JCSB for the phase 1 sales of the JCSB JVA and anticipates to receive further payments progressively following the progress of construction towards handovers of vacant possession to the purchasers of the JCSB JVA units moving forward. Further, phase 2 sales of the JCSB JVA is expected to commerce by the first half of 2026.

Moreover, on 31 January 2025, CDMSB has entered into another joint venture with developer CPG Puncak Sdn Bhd to develop a RM 1.36 billion mixed-use development on the Group's 35 acres of land within the Cybersouth Lands. Through this joint venture development, the Group will be entitled to a minimum landowner’s entitlement of RM 234 million, representing a 73.85% premium over the market value of the land. The Development will be undertaken over 8-9 phases, and is expected to be completed in 13 years, with an extension period of 3 years in the JVA. As a result, as and when the construction for the respective phases of the Development is completed, CDMSB shall entitled to receive its landowner's entitlement for the respective phase. The landowner's entitlement from the Proposed Joint Venture therefore provides the Group with a form of revenue to be recognised in the long term.

16. Current Year Prospect (Cont'd)

Additionally, in view of the positive property market outlook in Malaysia where real estate and construction performance had continued to improve throughout 2024 backed by stronger market activity and government initiatives, the Board opines that the Proposed Joint Venture represents another opportunity for the Group to further expand the revenue stream of its property development business. Pursuant thereto, the Board is optimistic of the future prospects of the property market which shall contribute to the Proposed Joint Venture.

Further, notwithstanding that the Group intends to further expand the revenue stream of its property development business via landowner's entitlement through the JCSB JVA and Development, the revenue contribution from the JCSB JVA and Development can only be recognised pursuant to an agreed schedule, which is contingent upon the completion of the specific phases of the JCSB JVA and Development. To be prudent, the Group will continue its focus on trading and services segment, which provides a more recurrent and stable form of revenue flow, that serves as a vital support mechanism until the Group's property development segment begins to generate consistent and substantial revenue.

The Group's trading and services segment has recorded losses in the recent years as a result of the Group's suppliers implementing cash payment terms for the purchase of the Group's ICT supplies. To maintain the segment, the Group has started negotiations with other ICT product suppliers with a more lenient credit payment term that will allow the Group to have sufficient cash liquidity to undertake new purchases and facilitate a wider range of product offerings. Although the trading and services segment may remain to be challenging in view of the competitive market environment of the ICT industry in Malaysia, the Group intends to expand the marketability of its ICT products by diversifying its product range and leveraging into e-commerce platforms such as Shopee and Lazada to reach out larger customer base and potentially increase volume of sales within the segment.

Moreover, the Group also intends to implement certain cost rationalisation strategies for its trading and services segment with the goal of reducing the operating costs of this segment as well as potentially improving the Group's liquidity and financial performance moving forward. Once the Group received adequate revenue contribution from the landowner's entitlement of the JCSB JVA and the Development, the Group may allocate additional resources to the growth of its property development segment. Notwithstanding that the expansion of the Group's main strategy is the growth of its property development segment, the Board intends to improve the financial performance of its trading and services segment and reduce its operating costs, with the objective to turn this segment profitable.

Taking consideration of the above, including the prospects of the Group's ongoing property development projects (i.e. the JCSB JVA and the Proposed Joint Venture), and the overview and outlook of the property market, the Board opines that the Proposed Joint Venture may contribute positively to the expansion of the Group's property development business, in order to reduce its reliance on its trading and services segment and to enhance its financial performance moving forward.

16. Current Year Prospect (Cont'd)

Lastly, the Company's agarwood plantation spans over 54 acres of land in Kuala Kangsar, Perak, which houses approximately 20,312 agarwood trees. Management believes that our plantation has the potential to generate sustainable value once commercial-scale yields are achieved.

The Board opines that through expanding its property development and agarwood plantation segments, the Group may reduce its reliance on its trading and services business, and create additional revenue stream in order to improve the financial performance and financial position of the Group moving forward.

The proceeds raised and allocated to fund the working capital requirement of the Group's agriculture segment from PP I and II have not been fully utilised due to the Group being in the process of testing and identifying the most suitable type of inoculant that may yield the ideal quality and quantity of resin, with results of the inoculation only observable after approximately two years.

To date, the Group conducted its first inoculation trials on 7 October 2021, which yielded unfavourable results. A second round of inoculation trials was subsequently carried out on 13 April 2023.

In view of the unfavourable outcome from the harvesting conducted on a limited number of inoculated trees on 12 and 18 July 2025, the Group has decided to vary the utilisation of the proceeds originally allocated for the inoculation and harvesting of agarwood trees, and reallocate them to general working capital requirements for the agriculture segment, as follows:

Balance of PP2 Proceeds	:	RM318,917.86
Total Balance of Proceeds	**:**	**RM715,158.13**
